Usage Design:

Immunoassay for the qualitative detection of immunoglobulin g (igg) antibodies to hepatitis c virus in oral fluid, fingerstick or venipuncture whole blood, plasma specimens, and serum

Test Capability Quantity:

25

Test Media:

Blood or plasma or serum or saliva

Component Breakdown Within Each Test Kit:

Contains sufficient materials for 25 tests, including: divided packet containing oraquick hcv rapid antibody test plus absorbent packet and oraquick developer solution (vial with 0.75 ml phosphate buffer solution containing polymers and an antimicrobial agent, reusable test stands, collection loops, and package insert

Special Features:

Store unused, unopened tests at 2 to 30 degrees c

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
