Usage Design:

Qc mtl.Control and verification calibration

Product Name:

I-stat ck-mb calibration verification 1-3

Special Features:

Calibration mechanism for creatine kinase mb mass controls level 1-3; ck-mb measurements can be used as an aid in the diagnosis and treatment of myocardial infarction (mi); two 1 ml vials of each of the three levels, for a total of 6 vials per set

Supplementary Features:

Liquid qc cardiac marker control level 4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
