Storage Temperature Range:

+2.0 to 8.0 degrees celsius

End Application:

6630-01-657-7485; analyzer, blood

Unit Package Quantity:

2

Usage Design:

For use in the verification of the precision and accuracy of the hemocue hb 301 system

Product Name:

Control hb 301 low level 1

Special Features:

Eurotrol hb 301 level 1 control, low 2 vials, eurotrol hb 301 control is an assayed hemoglobin control intended for use in the verification of the precision and accuracy of the hemocue hb 301 system; requires refrigeration between 2-8 degrees c

Unit Package Type:

Box

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
