Overall Length:

5.025 inches

Overall Height:

0.593 inches

Overall Width:

2.325 inches

Component Type And Quantity:

2 capacitor and 4 holder and 2 insulator and 1 mount and 10 resistor and 6 diode and 35 terminal and 5 transistor and 1 board

Special Features:

Mounting method: holes; component quantity: 74; mounting configuration: three 0.141 in. Dia holes irregularly spaced; fsc application data: control-indicators, electronic identification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
