**Overall Length:**

21.557 inches

**Overall Height:**

8.500 inches

**Overall Width:**

10.125 inches

**Current Type:**

Ac/dc

**End Application:**

An/asn-119 system on awacs, e-3 series aircraft

**Product Name:**

Navigational unit

**Voltage In Volts:**

115.0 and 26.0

**Special Features:**

Contains an inertial reference unit with associated electronics and a digital computer; maintains a gyro-stabilized platform at a reference attitude; unit is rack mounted

**Functional Description:**

Measures inertially sensed horizontal acceleration and inertially sensed attitude in 3 axis and transforms measurements into signals which enable computation of navigational data for display and aircraft useage

**Reference Data And Literature:**

T.O. 5n1-4-24-2

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T261-a
