Overall Length:

8.500 inches

Overall Height:

3.000 inches

Overall Width:

5.750 inches

End Application:

Nsn 7025-01-172-6541 programmable cartridge, combat talon ii

Voltage In Volts And Current Type:

115.0 ac

Product Name:

Data transfer unit

Special Features:

Panel mounted with 4 dzus fasteners; power 115 vac 400 hz 1 phase; 0-5 vac lighting power; designed for cockpit insulation in aircraft; interfaces between data transfer module (dtm) and dual redundant 1553b data bus

Functional Description:

Composes a system used to transfer digital data between aircraft and associated ground support facilities; used for preflight initialization of the embedded computer with programmed missions, inflight recording of performance/parameters and post flight retrieval of mission, maintenance and diagnostic data

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
