**Overall Length:**

7.000 inches

**Overall Height:**

9.800 inches

**Overall Width:**

23.300 inches

**End Application:**

E3a aircraft memory enhancement; rack 6237100-105

**Voltage In Volts And Current Type:**

115.0 ac

**Product Name:**

Cau assembly

**Functional Classification:**

Rr-6.1

**Special Features:**

Consists of four units: storage control unit, instruction unit, execution unit, and execution unit control

**Functional Description:**

Interfaces with multiplexer td-1443 and storage. Executes sequence of instruction stored in storage pool performing variety of arithmetic, logical, and branching operations

**Entry Date:**

10-09-15

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
