Overall Length:

7.000 inches

Overall Height:

9.800 inches

Overall Width:

23.300 inches

End Application:

E3a aircraft memory enhancment; rack 6237100-105

Voltage In Volts And Current Type:

115.0 ac

Product Name:

Cau assembly

Functional Classification:

Rr-6.1

Special Features:

Consists of four units: storage control unit, instruction unit, execution unit, and execution unit control

Functional Description:

Interfaces with multiplexer td-1443 and storage. Executes sequence of instruction stored in storage pool performing variety of arithmatic,

logical, and branching operations

Entry Date:

10-09-15

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
