**End Application:**

For use in the alaska/wisconsin air combat maneuvering instrumentation (acmi) range

**Functional Description:**

Global positioning system receiver/monitor provides variety of time code and rate outputs; equipment provides sub-microsecond timing accuracy relative to coordinated universal time; equipment operates from high stability internal oscillator or from external frequency standard

**General Description:**

Global positioning system includes global positioning system receiver/monitor, antenna/preamp, and 100 foot rg-213/u antenna cable

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
