End Application:

For use in the alaska/wisconsin air combat maneuvering instrumentation (acmi) range

Functional Description:

Global positioning system receiver/monitor provides variety of time code and rate outputs; equipment provides sub-microsecond timing accuracy relative to coordinated universal time; equipment operates from high stability internal oscillator or from external frequency standard

General Description:

Global positioning system includes global positioning system receiver/monitor, antenna/preamp, and 100 foot rg-213/u antenna cable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
