Overall Length:

14.250 inches

Overall Height:

7.620 inches

Overall Width:

10.120 inches

End Application:

C-17

Component Identifying Number:

+7101t software no.

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Voltage In Volts And Current Type:

28.0 dc

Product Name:

Digital computer

Special Features:

Rackmounted; uses software version p7101j

Functional Description:

Provides flight management function and mission capability; provides 2 dual redundant 1553b bus interfaces; provides input/output, computational, control, data storage, interface and built in test capability to perform navigation and guidance airdrop, rendezvous and stationkeeping

General Description:

Not to be linked with 17b1u6013 computers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
