**End Application:**

Dm-114b dme

**Special Features:**

Solid-state transmitter; 325 watts () of output power; two separate microprocessors are used; one to provide all processing and control computations and two perform the digital and analog input/output generation and input frequency tuning interfaces

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

A532d0
