Overall Length:

14.250 inches

Overall Height:

7.620 inches

Overall Width:

10.120 inches

End Application:

C-17

Functional Description:

Provides flight management function and mission capability; provides 2 dual redundant 1553b bus interfaces; provides input/output, computational, control, data storage, interface and built in test capability to perform navigation and guidance airdrop, rendezvous, stationkeeping, small austere air field (ssaf) operations and flight plan operations

Supplementary Features:

Effectivi type 17a005-089

General Description:

Rackmounted; uses software version p7101j

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
