**Overall Length:**

14.250 inches

**Overall Height:**

7.620 inches

**Overall Width:**

10.120 inches

**End Application:**

C-17

**Functional Description:**

Provides flight management function and mission capability; provides 2 dual redundant 1553b bus interfaces; provides input/output, computational, control, data storage, interface and built in test capability to perform navigation and guidance airdrop, rendezvous, stationkeeping, small austere air field (ssaf) operations and flight plan operations

**Supplementary Features:**

Effectivity type 17a005-089

**General Description:**

Rackmounted; uses software version p7101j

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli
