Overall Height:

11.000 inches

Overall Width:

8.500 inches

End Application:

Cn-1689

Special Features:

A) provides outputs of: acceleration, velocity, position, heading, attitude, attitude rates (roll, pitch, azimuth) b) contains 3 ring laser gyros and 3 accelerometers in a strapdown configuration c) embedded global positioning system receiver (egr) (rf input)- gasr based d) 1553/b multiplex bus compatible e) built in test incorporated f) 32 bit microprocessor g) arinc 429 interface card h) multi-mode receiver that provides: instrument landing system (ils), very high omni bearing receiver (vor), marker beacon (mb).

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T261-a
