Special Features:

Communication with sbe45 is over an internal, 3-wire, rs-232c link; conductivity measurement range 0-7 s/m (0-70 ms/cm); temperature measurement range minus 5 to plus 35 deg. C; input power 8-30vdc; pvc housing

Functional Description:

For shipboard determination of sea surface (pumped-water) conductivity and temperature

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
