**Overall Length:**

10.000 inches

**Overall Height:**

8.000 inches

**Overall Width:**

10.000 inches

**Ac Voltage Rating:**

115.0 volts

**Dc Voltage Rating:**

28.0 volts

**Frequency Rating:**

400.0 hertz

**End Application:**

C141

**Joint Electronics Type Designation System Item Name:**

Recorder, signal data

**Joint Electronics Type Designation System Item Type Number:**

Mxu-553/a

**Electrical Power Source Relationship:**

Operating

**Case:**

Not provided

**Recording Method:**

Electromechanical

**Recording Medium For Which Designed:**

Tape

**Phase:**

Single

**Functional Description:**

Records signals received from the signal data converter multiplexer at a total system sampling rate of 240 samples per second; data recorded: linear accelerations; rotational accelerations; airspeed; altitude; event counters; documentary; control surface positions; stresses; linear velocities; rotational velocities

**Reference Data And Literature:**

T.O. 5f23-3-6-4

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T207-a
