Overall Length:

10.000 inches

Overall Height:

8.000 inches

Overall Width:

10.000 inches

Ac Voltage Rating:

115.0 volts

Dc Voltage Rating:

28.0 volts

Frequency Rating:

400.0 hertz

End Application:

C141

Joint Electronics Type Designation System Item Name:

Recorder, signal data

Joint Electronics Type Designation System Item Type Number:

Mxu-553/a

Electrical Power Source Relationship:

Operating

Case:

Not provided

Recording Method:

Electromechanical

Recording Medium For Which Designed:

Tape

Phase:

Single

Functional Description:

Records signals received from the signal data converter multiplexer at a total system sampling rate of 240 samples per second; data recorded: linear accelerations; rotational accelerations; airspeed; altitude; event counters; documentary; control surface positions; stresses; linear velocities; rotational velocities

Reference Data And Literature:

T.O. 5f23-3-6-4

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T207-a
