Width:

5.000 inches

Current Type:

Ac

Ac Voltage Rating:

115.0 volts

Frequency Rating:

400.0 hertz

Depth:

8.000 inches

Contact Quantity:

32

End Application:

Used on a7d aircraft

Contact Type:

Pin

Presentation Type:

Drop flags and servo motor

Electrical Connection Quantity:

1

Pointer Purpose:

Pitch of acft; glide slope pointer; bank steering bar; pitch steering bar; inclinometer

Pointer Type:

Reference all pointers

Mounting Facility Type And Quantity:

1 panel

Phase:

Single

Special Features:

White non-luminous finish; bezel mounted in panel; with instrument lamp; includes horizontal alarm flag

Height:

5.250 inches

Supplementary Features:

Tech order 5f8-3-30-24; provides three axes information; pitch, rolland azimuth

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A532a0
