**End Application:**

F-16a, b's

**Joint Electronics Type Designation System Item Type Number:**

Ro-603/a

**Criticality Code Justification:**

Feat

**Special Features:**

Electrostatic discharge sensitive; 9 plug-in circuit card assemblies; plug-in power supply assembly; mother-board assembly; output through an rs-422 interface; hard mounted to the airframe

**Supplementary Features:**

Signal acquisition, data compression & non-crash survivable mass memory for sldr subsystem

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

Yes - demil/mli

**Fig:**

T207-a
