Reliability Indicator:

Established

Overall Length:

3.000 inches

Err Default:

Err default

Special Features:

Plastic insert universal venturi tube is differential producing primary flow metering element used to accurately measure water, air, gas, acids, alkalies, slurries, etc., where low head loss with highest accuracy is desired; corrosion resistant light weight universal venturi tube is made from fiberglass reinforced polyester throughout

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T261-a
