Overall Length:

12.930 inches

Overall Height:

7.690 inches

Overall Width:

9.230 inches

End Application:

Pacer special

Special Features:

Nuclear hardness critical

Functional Description:

Digital outputs of pitch, roll, yaw, drift angle, true heading, vehicle pos.(longitude & latitude), computer aoa, sideslip & magnetic heading; all information federal to flight control computer

Nuclear Hardness Critical Feature:

Hardened

Reference Data And Literature:

T.O.1b-2a-4-27

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T261-a
