End Application:

Tg2, various

Product Name:

The hgs computer

Special Features:

The hgs computer is what distinguishes the rockwell collins head-up guidance system from a simple hud. Based on inputs of the essential flight data the aircraft systems, the computer calculates the precision guidance and flight path information and sends it to the overhead unit for projection on the combiner for the pilots. Can also accept video generators and combine it with the symbology for display. The computer is a standard 6 mcu size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

A32200
