Overall Height:

8.000 inches

Overall Width:

10.750 inches

Display Type:

Liquid crystal

Unit Design:

Panel mounted

Product Name:

Display, multiple aircraft parameters

Special Features:

Iclds-10 displays information in alphanumeric text and graphic formats; display type: color active matrix liquid display; resolution: 100 dots per inch; connections: 100-pin mil-spec connector; voltage: 10 to 35 vdc; consumption: 70 watts, , in cold conditions with all heaters turned on; 18 watts normal operating mode

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A506z0
