Current Type:

Ac

Shock Mount:

Not provided

Design Type:

Noncageable

Unit Type:

Vertical

Wheel Power Method:

Electric

Freedom Axis Quantity:

2

Gimbal Quantity:

2

Axis Displacement Limitation In Deg:

Porm 82 degrees for roll

Gimbal Torque Application Method:

Induction motor

Torqued Gimbal Quantity:

2

Sensing Output/signal Level Method:

Syncaro output 11.8 v with 26v external excitation

Voltage In Volts:

115.0

Phase:

Three

Frequency In Hertz:

400.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T261-b
