Direct Current Voltage Rating In Volts:

22.0 and 29.5

End Application:

C-17 acft

Unpackaged Unit Length:

16.30 inches

Unpackaged Unit Width:

10.10 inches

Unpackaged Unit Height:

7.60 inches

Power Source:

External

Intelligence Input Method:

Electrical

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Special Features:

Operating temp -40 to 131 degrees f; altitude up to 50, 000 feet; memory 314k; basic processor unit without software is part number 103e415g14; part number 17b1u6001-555 is the basic unit with software version 3.1 installed

Functional Description:

Used to compute primary flight control, stability and control augmentation and automatic flight control functions; performs all calculations necessary to implement functions of the stability and control augmentation system, autopilot, autothrottle, flight director, head up display control and ground proximity warning system

Supplementary Features:

Manufacturers name: computer, flight control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30800
