Flight Control Processor - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6615-01-448-2341

Direct Current Voltage Rating In Volts:

22.0 and 29.5

End Application:

C-17 aircraft

16.30 inches
Unpackaged Unit Width:

Unpackaged Unit Length:

10.10 inches

Unpackaged Unit Height:

7.60 inches

Power Source:

External

Intelligence Input Method:

Electrical

Features Provided:

Electrostatic sensitive

Criticality Code Justification:

Cbbl

Special Features:

Effectivity p41 to subsequent acft; p/n 103e4151g14 is the hardware only

Functional Description:

Used to compute primary flight control, stability and control augmentation and automatic flight control functions; performs all calculations necessary to implement functions of the stability and control augmentation system, autopilot, autothrottle, flight director, heads up display control and ground proximity warning system

Supplementary Features:

Manufacturers name: computer, flight control

Shelf Life:

N/a

Unit Of Measure:

Demilitarization:

No

Fiig:

A30800
