Overall Length:

6.000 inches

Overall Height:

4.000 inches

Overall Width:

5.000 inches

Voltage In Volts And Current Type:

10.0 dc

Special Features:

Power consumption less than 8.0 watts; connector 15 pin sub-miniature "d", male; operating temperature minus 40.0 degrees c to plus 60.0 degrees c; weight less than 3.5 lbs; performance update rate greater than 100.0 hz; start-up time valid data less than 1.0 second

Functional Description:

Used to measure roll and pitch angles in dynamic measurements

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
