## NSN 6620-01-413-7048

Engine Diagnostic Unit - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/6620-01-413-7048

| Terminal Type:                                                                                                                              |
|---------------------------------------------------------------------------------------------------------------------------------------------|
| Connector, plug and connector, receptacle                                                                                                   |
| End Application:                                                                                                                            |
| F100-pw-229                                                                                                                                 |
| Power Source:                                                                                                                               |
| External                                                                                                                                    |
| Input Intelligence Type:                                                                                                                    |
| Engine operating characteristics                                                                                                            |
| Intelligence Input Method:                                                                                                                  |
| Electrical                                                                                                                                  |
| Special Features:                                                                                                                           |
| With 3.1.0 logic; acquires measurement data from the engine controls and sensors; records engine operating times and cycle; detects         |
| critical enginedata and stores selected event parameters; also serves as an engine interconnecting box which distributes variuos electrical |
| signals between engine components, accessories, and the airframe                                                                            |
| Shelf Life:                                                                                                                                 |
| N/a                                                                                                                                         |
| Unit Of Measure:                                                                                                                            |
| -                                                                                                                                           |
| Demilitarization:                                                                                                                           |
| Yes - demil/mli                                                                                                                             |
| Fiig:                                                                                                                                       |
| A30800                                                                                                                                      |
|                                                                                                                                             |
|                                                                                                                                             |
