Overall Length:

7.300 inches

Overall Height:

4.530 inches

Overall Width:

3.050 inches

End Application:

Aircraft; airbus a330, a340

Measurement Range:

+400.0/+33000.0 pounds per hour

Product Name:

Fuel flow transmitter

Special Features:

Transmitter is aluminum body with cylindrical bore; a turbine driver, flow straightener and measurement assembly are put on a shaft and installed in the bore; for use in aircraft flow measuring systems; operates with a fuel flow indicator to show rate of fuel flow, total fuel used, or both; no external power is necessary for the transmitter; component maintenance manual 73-35-36 pages 1 and 2 feb 15/02 figure 1; supplied mounting is a flat surface i a rectangular electronics compartment on the transmitter for 2 magneticv pickoff coils and a skew (swirl) rudder; electrical connector receptacle keyway is on outside of electronics compartment and a cover fits on the electronics compartment

Special Test Features:

Fuel compatibility jet a, jp-4 jp-5 mil-f-5624h

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fiig:

T145-b
