Ac Voltage Rating:

Between 110.0 volts and 220.0 volts

Frequency Rating:

60.0 hertz

Major Components:

Amplifier; analyzer, calibrator, filter, generator, integrator, modulator, oscilloscope, potentiometer, preamplifiers, precision bias supply, bandwidth test set, digital voltmeter, selector switch, remote control shutter, panel control, cell box, alternate source, blackbody

Electrical Power Source Relationship:

Alternate operating

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

Infrared detector

Phase:

Single

Special Features:

All items housed in console

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-a
