End Application:

Electronic test

Frequency Range:

+1.000 to 200.000 kilohertz

Special Features:

Transistorized 1-2-4-8 coded output self testing; measuring range, timebases selectable in 10 microsec steps to 1.999 sec timing units; range of n/digital preset switches; 1 to 19999 count capaci type 5 digits, sensitivi type 0.1v rms into 100 k omega, can be decreased continuously to 110 v rms

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T297-a
