Ac Voltage Rating:

115.0 volts

End Application:

Test set type an/apm 349

Inclosure Feature:

Multiple item w/housing

Test Type For Which Designed:

High level rf power

Functional Description:

Pulse power test set provides pulse modulated high level rf power for testing & calibrating tacan, dme, & iff equipment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T228-a
