Component Type And Quantity:

10 capacitor and 20 rectifier and 20 resistor and 1 socket and 50 terminal

Special Features:

Component type and quantity: wiring board 1; mounting method and configuration: unthreaded holes; 22 awg tinned copper wire; fault indicator subassembly

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A511I0
