Width:

42.000 inches

Depth:

39.500 inches

Functional Classification:

Aa-9.1

Special Features:

Provides power supplies for the regulated supply of porm 25, 28, 150, 300, & 600 volts

Functional Description:

Unit is designed to provide the supply voltages necessary for the operation of the printed circuit boards used in the an/fps-27, may be used for the for the supply of voltages for any requirement, where the simplicity of operation and adaptability of the test equipment is of value

Height:

52.500 inches

Entry Date:

73-06-15

Reference Data And Literature:

To 33a1-13-178-1

Type/model Designation:

Ts-1739/fps-27

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-a
