Phase:

Three

Functional Classification:

Aa-1.1

Functional Description:

Used to evaluate the condition or performance of the 1.8 kvdc power supply organic to the transmitter screen pulser equipment in the an/fps-85 radar set; enables testing of the power supply under normal operating conditions; the output voltage of the power supply is connected to the test set where it is applied to a dc voltmeter & a resistive load; the voltmeter on the test set indicates the output voltage level of the uut & the resistive load enables the power supply to operate under normal oper conditions
