Ac Voltage Rating:

115.0 volts and 230.0 volts

Frequency Rating:

Between 50.0 hertz and 400.0 hertz

Product Name:

Distortion analyzer

Phase:

Single

Special Features:

Automatic nulling mode; hi-pass filter; rack mount

Supplementary Features:

T.O. 33a1-5-269-11 & tm11-6625-1576-15; measures distortion and ac voltages; automatically tunes both legs of a bridge circuit which rejects fundamental when rejection circuit is initially set within the ranges of the loop

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A532p0
