**Overall Length:**

12.000 inches

**Overall Height:**

5.000 inches

**Overall Width:**

2.600 inches

**Unit Type:**

Function generator

**Functional Classification:**

Bb-1.5

**Functional Description:**

Produces sine, square, triangle, pulse, & ramp waveforms from 0.001 hz to 1 mhz; an external vcf input permits control of output frequency from an external voltage source; frequency sweep up to 1000: 1 ratio is accomplished by applying a voltage ramp to vcf input; a hold control allows operation of generator to be halted instantaneously at any point in its cycle; can be powered by any tm500 power module

**Entry Date:**

80-08-15

**Reference Data And Literature:**

T.O. 33a1-8-768-1

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T228-b
