Overall Length:

14.125 inches

Special Features:

Used as a calibration aid for all tektronix 7000 series oscilloscopes; used to extend the range of gain, rise time and frequency response calibrations

Supplementary Features:

Manufacturers name: fixture, calibration, signal standardizer

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T294-m
