Functional Classification:

Aa-9.1

Functional Description:

Designed to test the air data computer system cp-953a/ajq. It sequentially steps, either in automatic or manual mode, through a range of comparison test signals providing go/no-go lamp indications. If no-go does occur, the sequencing is stopped and the failed test number is displayed. Appropriate corrective action is necessary for the test sequence to be continued

Entry Date:

76-10-01

Reference Data And Literature:

Navair 17-15cab-14

Relationship To Similar Equipment:

Equal: (80378) 216-01904-2

General Description:

O/a dim: 17.000 in. Lg, 15.000 in. W, 15.000 in. H; wt: 47 lbs; voltage: 109.25vac to 120.75vac, 25vdc to 31vdc; frequency: 400 hz; phase: single; power: 0.25 amperes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
