Overall Length:

13.700 inches

Overall Height:

5.000 inches

Overall Width:

2.625 inches

Unit Type:

Wide-band amplifier

Functional Classification:

Aa-11.5

Functional Description:

225 mhz amp; constant bandwidth over deflection factor range of 5 millivolts/div to 5 volts/div; polarity of display selectable; bandwidth selectable to full or limited to 20 mhz for low freq applications; compatible w/ 7000 series mainframes of tektronix inc

Entry Date:

80-09-01

Reference Data And Literature:

Af t.O. 33a1-2-183-11; tektronix inc. R/n 070-1378-00

Relationship To Similar Equipment:

Nsn 6625004780598

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
