Outside Surface Treatment:

Enamel, gray

Overall Length:

27.000 inches

Overall Height:

4.500 inches

Overall Width:

5.000 inches

Trade Designation:

Radio frequency cable

Controlling Agency:

Jetds

Identifying Number:

Rg-9/bu type no.

Operating Frequency:

Between 500.0 megahertz and 4000.0 megahertz

Detector Type:

Crystal

Termination Controlling Agency:

Hewlett and packard co.

Probe:

Included

Dial Gage Indicator:

Not included

Vernier Scale Range:

+0.000 to 450.000 millimeters

Vernier Scale Measurement Resolution:

0.100 millimeters

Termination Name:

Connector, receptacle, electrical

Termination Identifying Number:

Ba-95b part no. And ba-95c part no.

Conductor Type For Which Designed:

Transmission line

Slope Error Elimination Adjustability:

Not adjustable

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

T263-n
