Basic Shape Style:

Rectangular or square

Inclosure Type:

Encased

Installation Design:

Top of cabinet/counter

Circuit Construction Type:

Solid state

Frequency Per Channel:

18.0 gigahertz operating channel err-100

Indicator Device Type And Quantity:

1 meter

External Ac Operating Voltage In Volts:

220.0 2nd voltage

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A32200
