**Basic Shape Style:**

Rectangular or square

**Inclosure Type:**

Encased

**Installation Design:**

Top of cabinet/counter

**Circuit Construction Type:**

Solid state

**Frequency Per Channel:**

18.0 gigahertz operating channel err-100

**Indicator Device Type And Quantity:**

1 meter

**External Ac Operating Voltage In Volts:**

220.0 2nd voltage

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
