Overall Length:

15.000 inches

Overall Height:

12.000 inches

Overall Width:

10.000 inches

Current Type:

Ac

Frequency Rating:

60.0 hertz

Functioning Signal Method:

Audible and visual

Armature Diameter Accommodated:

Between 2.500 inches and 6.000 inches

Voltage In Volts:

115.0

Phase:

Single

Special Features:

Includes indicating light and ammeter, input power cable and plug

Functional Description:

Used for locating short circuits, open circuits, and grounds in engine starting motor armatures and in battery charging generator armatures from 2.5 to 6 inches in diameter

Supplementary Features:

Manufacturers name: growler

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-b
