General Description:

C/o one constant phase variable attenuator, one dephaser, one lambda/4 vhf cable, one lambda/4 uhf cable, a cable to connect with the attenuator so that the insertion phase will be two wavelengths porm 3 deg, a cable to connect with the dephaser so that the insertion phase will be two wave lengths porm 3 degrees at uhf freq, and a cable to connect with the dephaser so that the insertion phase will be one wavelength porm 3 degrees at vhf freq, for the attenuator the insertion loss shall be less than 1.25 db and the range shall be greater than 6.0 db, for the dephaser the insertion loss shall be less than 1.0 db and the range shall be porm 40 degrees uhf and porm 13 degrees vhf, the vswr for the attenuator, dephaser, and lambda/4 cables shall be less than 1.25/1.00
