Mounting Type:

Portable

Overall Length:

11.000 inches

Overall Height:

7.000 inches

Overall Width:

8.000 inches

Current Type:

Ac

Frequency Rating:

Between 50.0 hertz and 60.0 hertz

Case Material:

Aluminum

Case Surface Treatment:

Enamel, gray

Frequency Range Rating:

+54.000/+86.000 megahertz

Output Impedance Rating:

75.0 ohms

Voltage Rating:

117.0 volts

Modulation Type:

Fm

Fixed Frequency Rating:

70.0 megahertz

Fixed Frequency Quantity:

1

Maximum Signal Output:

Output level adjustable from minus 60.0 to plus 13.0 dbm into a 75.0 ohm load

Signal Output Constancy:

Lineari type 0.2 percent with 20.0 mhz deviation

Modulator Location:

External

Modulated Frequency Rating:

16.0 megahertz

Phase:

Single

Special Features:

Item provides a 70.0 mhz undistorted frequency modulated signal for delay and linearity measurements in microwave systems, modules, or cables

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T320-j
