Width:

15.310 inches

Length:

9.500 inches

End Application:

Nsn 6625-00-972-1451 test set

Test Type For Which Designed:

Programs test signals to accomplish specific test functions

Special Features:

Manufacturers name: programmer, electronic test signal

Functional Description:

Processes electronic test signals in a manner suitable for the predetermined test of electronic circuit plug in units; can perform self test

Height:

3.200 inches

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
