Ac Voltage Rating:

115.0 volts and 230.0 volts

Frequency Rating:

Between 50.0 hertz and 400.0 hertz

Product Name:

Distortion analyzer

Phase:

Single

Supplementary Features:

Same as model 333a except includes am detector; measures total distortion down to 0.1 pct full scale at any frequency between 5 hz to 600 kilohz; opt h05 low-pass filter substituted for hi-pass filter; meter reads in dbm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A532p0
