**Average Life Measurement:**

Indefinite

**Inclosure Type:**

Encased

**Circuit Construction Type:**

Solid state

**Functional Description:**

Uextends the frequency range of precision test amplifier mt7411a & precision automatic noise figure indicator mt7514a. Mateable with preamplifier mt7412a. 2.0 to 4.0ghz frequency range with type n connector; 1milliwatt I.O. Level

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A32200
